

On the Subject of Runic Math

Arabic numbers are pretentious, so we switched to ~~Limborian~~ instead.

- The module will feature a series of equations whose numerical glyphs are currently unknown.
- Each glyph corresponds to one numerical digit using Arabic numbers in base 10.
- Each rune on the module corresponds to exactly one Arabic digit, and cannot share digits with other runes.
- Find each rune's correlation to Arabic digits and press the runes in ascending order to disarm the mod.
