

## On the Subject of Solitaire Chess

*God damn you really must be lonely to not even play against a bot.*

- This module features a chessboard with pieces of one color on it.
- Unlike standard Chess, pieces can capture the same color. To disarm the module, capture all the pieces in such a way that only one piece is remaining.
- The rules of (this version) of solitaire chess is as follows:
  - Every move must be a capture.
  - Pieces move as they normally would.
  - Promotions, en peasant, and castling are not allowed.
  - No piece may capture more than two times.
  - If there is a king, it must be the final piece.
